

ArtStor™ System

Truly a work of art...

Whether storing artwork for a rotating museum exhibit or housing a personal collection, the ArtStor™ High-density Mobile System is the ideal solution.

Specifically designed to hang virtually any size piece of framed or unmounted artwork, ArtStor's unique mesh frames accommodate any specially designed hooks, allowing easy organization and secure storage of even the most delicate masterpieces.

Space-saving

Reduce floor space usage by 50% or more with our new track design. ArtStor™ carriages can sit side-by-side on one track; the two-track design nests carriages together, saving even more space.

Designed to protect

The bumpers on the carriages and the design of the framework ensure adequate spacing between carriages which prevents damaging the artwork when carriages are racked together.

The heavy-duty support bars stabilize the ArtStor™ system, eliminating any jostling of precious art while the carriages are in motion.

CUSTOMIZABLE, VERSATILE, DURABLE AND GUARANTEED

For more than 30 years, California Space Management, Inc. has been delivering winning storage solutions to organizations across all industries helping them to save space, improve safety and enhance operational efficiencies.

Our dedicated team is committed to providing you with the best products, services and solutions available today, and we look forward to learning more about how we can help you.
