Why choose csm[®] ?

Because we understand storage. We meet your challenges of limited floor space, budget constraints, and future expansion with a full line of innovative storage, filing, and material handling equipment. California Space Management, Inc. has over 1000 successful project completions throughout Southern California. 30 years and counting...

Our mission is doing what's best for you... PERIOD!

- A CSM representative will visit your facility to measure spaces and carefully listen to your requirements. We are committed to maximizing storage capacity at the lowest cost.
- A site specific floor plan layout and elevation with storage capacity is supplied to you - at no charge or obligation.
- Unmatched manufacturing efficiency and our class B general contractor license insures turnkey solutions at the lowest costs available.

Let CSM solve your unique storage challenges!

HIGH DENSITY MOBILE STORAGE - AN OVERVIEW

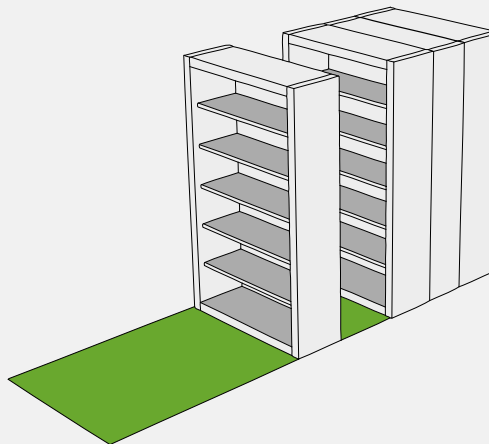

Build the foundation for an efficient, productive office with a high-density storage system. Our systems optimize space and can substantially increase capacity of filing or storage in an existing area or free up space for other uses.

One simple concept will:

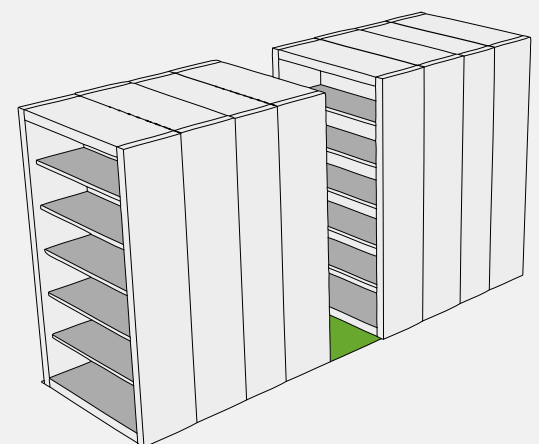

- Dramatically increase storage capacity and speed up access to critical files and other stored materials
- Minimize or eliminate off-site storage
- Increase security over confidential information through controls allowing secure access
- Make room for additional staff or equipment
- Improve organization, productivity, and customer service

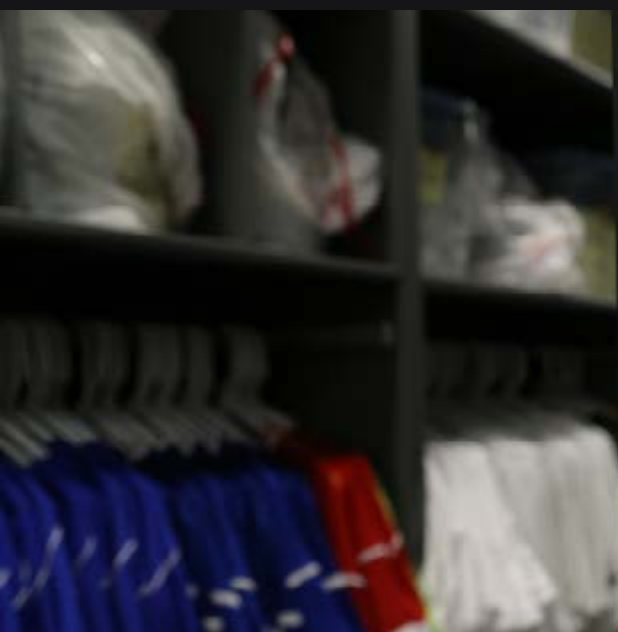

Conventional type storage:
wasted space

Free up half your space
for other uses...

Or store twice as much in the
same amount of space

ATHLETIC STORAGE AT UC SAN DIEGO

8

MOBILE STORAGE SYSTEMS - TYPES

Mobile Storage gives you significantly greater storage capacity per square foot of floor space. Conventional shelving or cabinets are mounted on carriages that travel on rails. Non-productive fixed aisle space is eliminated!

Mobile Systems are custom designed to fit your space and integrate seamlessly into any work environment.

Two basic modes of operation are available:

POWERED

- Users open system aisles at the push of a button or via computerized commands
- Designed for maximum productivity for high access storage/filing
- State of the art engineering and safety systems
- Programmable security and controlled access for specific users

MECHANICAL ASSIST

- Users open system aisles by rotating ergonomic drive handles
- Allows lengths of up to 60 foot carriages with effortless movement
- End panel design options include steel, laminate, and/or real wood
- Standard safety features are fully code compliant

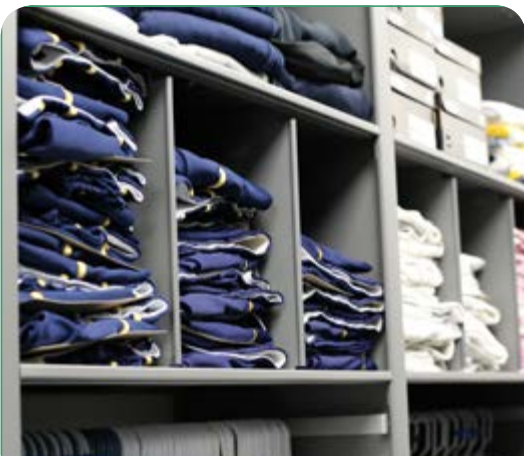

Email us at info@caspacemanagement.com

9 STATIC SHELVING - AN OVERVIEW

Whether you need a few sections for a storeroom, or the project requires “miles of aisles,” California Space Management, Inc. can help. All types of shelving are available. The key to “getting it right” is a no-obligation survey by a California Space Management, Inc. representative at your facility.

Factors in Shelving Selection

1. The Application - What media (file folders, books, boxes, etc.) is being stored and what are the aesthetic needs for the location
2. The Media - What are the dimensions/weights of the items, and what shelf clearance is required
3. The Location - The room dimensions, staff accessibility and building code will affect the “best solution”

UNLIMITEDSHELVINGOPTIONS

CABINETS

10

Our cabinets are offered in a range of industry standard sizes and styles and can be custom designed to meet specific storage needs. CSM provides a wide selection of steel or wood bookcases, fireproof cabinets, and can fabricate custom sizes per specification. Locking security option ensures HIPPA privacy compliance.

Features include:

- Front-to-back or side-to-side filing
- Interchangeable components and flexible drawer layouts
- Heavy gauge, reinforced steel and welded construction
- Cabinets are configured on 1½" centers
- CD, DVD, video tape, and data cartridge sized drawers
- Custom cabinet fabrication

Performance

Locker performance begins with a strong frame and door, and can be enhanced depending on the latching mechanism, choice of ventilation, and accessories.

The variation of locker styles can seem endless! Choosing the “correct” locker can be made simple by having California Space Management, Inc. perform an on-site survey at your facility. The perfect locker for a gym isn’t the same one you’d like to have for a nurse’s area or a sheriff’s station.

Basics

- How will the lockers be used?
- What performance, durability, and security characteristics matter most?
- How many openings are needed, and what are the dimensions of the items stored?

An on-site survey by a qualified supplier who understands appropriate layout and building code is essential to getting it “right.”

BUSINESS STORAGE SOLUTIONS

In the ever-more competitive world of business, companies are constantly seeking to gain an edge in terms of productivity and performance. Our solutions provide intelligent storage that both makes the most of your space and adapts as your needs evolve. Here are just some of the business benefits: building productivity, innovation and teamwork; consolidating staff, equipment and files; maximizing control and security; and opening up more space for operations through more efficient storage of large volumes of material.

DOUBLE OR TRIPLE THE AMOUNT OF STORAGE SPACE

Unlike the traditional static storage concept, mobilized storage systems require just one moving aisle that opens and closes only where and when needed to provide full accessibility to all materials for quick, safe retrieval.

Key Benefits

- Create up to 100% more space for racking or shelving units, in the same footprint
- Free up as much as 50% of your existing storage space for revenue-generating activities without expanding into new space
- Strategically store and organize necessary supplies and materials close to your employees, so they can work more efficiently

VERTICAL CAROUSEL & LIFT

26

The vertical carousel is a vertical storing system with drawers representing the ideal solution for handling, storage, and fast picking of components, semi-processed products and finished products in various companies. The system has been designed to optimize the covered area and the picking working speed; it is formed by an entirely modular structure that fully covers the room height, up to 14 meters.

Features

- Outside, inside and double picking bay to dramatically increase picking speeds
- Features a powerful touch screen console
- Works with computer processing systems for the integrated management and control of automatic storing systems
- Formed by an entirely modular structure that fully covers the room height, up to 14 meters

California Space Management, Inc. has developed and operates within a fully integrated process. This guarantees a seamless transition from your existing equipment to a new storage solution. Your project will receive exacting and individual design, including:

- Needs analysis by listening carefully to your requirements, including an on-site survey, without cost or obligation
- A firm quotation/proposal with exact costs and detailed specifications
- Auto-CAD design of layout, elevation, and storage capacity
- Structural calculations by a State Licensed Engineer ensuring safety and code compliance
- Conduct site visits to view similar equipment applications
- Seismic installation and warehousing
- Complete training and ongoing support services

Email us at info@caspacemanagement.com

1

Request a Consultation

You're at step one of our three-step process. From here, you can call us directly at (800) 873-1707, email us at info@caspacemanagement.com, or you can move forward to step two and start the process on your own - your call.

2

Design a Solution

Ok, step two - we're on our way and time to think about your storage needs. We're always available by phone, or you can submit a brief form online and we'll contact you for some additional details so we can begin working on your design solution.

3

Install a System

Here's the fun part - time to build your system on site. You can leave this part to us. We've done this over a thousand times and we've got the best team in So Cal (like the Lakers of the 80's, but shorter).

31 CLIENT REFERENCES

During the past thirty years, California Space Management, Inc. has served many of the areas most respected organizations and institutions. Here are just a few of our satisfied clients:

SOCIAL RESPONSIBILITY

"When company president Curtis Dadian learned that his six-year-old daughter had been diagnosed with cancer, he channeled his energy into creating The Giving Office. I love the creative way The Giving Office delivers goods and services while at the same time benefiting people in need. This is the kind of business model that the world needs today. I wholeheartedly support this effort and encourage your enthusiastic participation."

Ken Blanchard, coauthor of *The One Minute Manager®* and *Leading at a Higher Level*

Your qualified purchase of products at California Space Management, Inc. will result in a 1% of sale donation by CSM to aid in the treatment and prevention of pediatric sarcoma cancer through support of one or more of the below named foundations, all 501c3 non-profit organizations.
